

# WHAT IS YOUR FOREST FOOTPRINT?

Why you should use FSC certified timber

## The problem

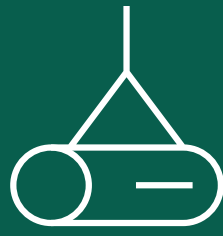

Deforestation rates up to 36 soccer pitches per minute.

20% of the worlds greenhouse CO2 emissions are from forest fires, land degradation and deforestation.

Main drivers behind deforestation are:

Agriculture

Illegal logging

Cattle farming

## The solution

By choosing FSC certified products you:

Support sustainable forest management.

Safeguard forests from deforestation and land degradation.

Ensure health, safety, and training for local communities.

Protect biodiversity & ecosystems.

Drive economical incentive to protect forests from land conversion.

## What you can do?

Look for FSC certified products.

Become FSC certified.

Communicate about sustainably produced forest products.
